

Cuts 4 types of DIN rail:

- 35 x 7.5mm standard symmetric steel rail
- 35 x 15mm symmetric steel rail
- 32mm asymmetric steel rail
- 15mm miniature steel rail

Part Number:

ASI305001 – 4 Bore DIN rail cutter with
1 meter ruler and end stop

Specifications:

Length: 42½" (with ruler attached)
Width: 30½"
Height: 10" (handle in the down position)
Weight: 28 lbs.

The *NEW* ASI DIN rail cutter is your low cost, time saving alternative to using a vise and hacksaw to cut your DIN rail. This cutter will give you a high quality factory cut without distorting the specifications of the DIN rail. If you have any question, contact ASI toll free 877-650-5160.

- *Powerful lever action design reduces force needed to cut all rail types.*
- *Manufactured of hardened steel for years of maintenance free operation.*
- *The rail cutter includes a one meter ruler with built in end stop for time saving repetitive cutting.*
- *Bench top design does not need to be mounted permanently for operation.*
- *One die cuts 4 rail types, reducing set-up time for die changeovers.*
- *The cutter produces a burr free finished cut, eliminating the need for secondary filing or grinding.*
- *Designed and priced aggressively to be affordable for any size shop, big or small.*
