### Reed contact sensor / magnet switching distance (mm)

**DIAMETER 18**  
Distance      Hysteresis

Distance	Hysteresis	Magnet
12	7	MG01
10	6	MG02
-	-	MG03
22	9	MG04
20	9	MG05

### Magnets dimensions (mm)

**WARNING:** The data specified in this table have an approximate value because they depend on the magnet position, on the material on which it is applied (ferromagnetic or not) and because they are related to the magnet during the frontal approach. Reed contact sensors can be also activated laterally considering that switching distances are always influenced by the magnet position and orientation besides the material on which it is applied (ferromagnetic or not).
