

## 3-phase switching power supply 400-500 Vac output power 500 W

- 3-phase input 340...550 Vac or 2-phase with derating
- Short circuit, overload, over temperature, input and output overvoltage protections
- High inrush current to guarantee downstream overcurrent protections selectivity and to start-up heavy loads
- High efficiency and low dissipated power
- Suitable for applications in SELV and PELV circuits
- Input protected by ASSIL circuit (Surge Suppressor and Inrush Limiter)

### NOTES

- The depth dimension includes the DIN rail clamp.
- (1) Version available upon request; for information call our sales department, local agent or representative
  - (3) Over 50°C (122°F) apply a derating of about 6 W/°C
  - (4) For this peak current, the output voltage does not drop more than 10% of the nominal value, but the current value, provided by the power supply also depends on the total line resistance.
  - (5) Version CSG500G is not suitable for SELV applications
